PROJECTS 2

LINIT-
Projects 2

Glasfabrik Lamberts GmbH+Co KG

Das im Jahre 1887 gegründete Familienunternehmen Glasfabrik LAMBERTS GmbH+Co KG in Wunsiedel beschäftigt zur Zeit ca. 120 Mitarbeiter und ist das einzige private Flachglasunternehmen Europas, das keinem Konzern angehört.

Die Erfahrung aus nunmehr 110 Jahren Gussglasherstellung, ein Mitarbeiterstamm mit Familientradition, der zum Teil schon in der vierten Generation im Unternehmen mitwirkt, sowie modernste Anlagen gewährleisten qualitativ hochstehende Produkte, die national und international vertrieben werden. Die Glasfabrik LAMBERTS ist DQS zertifiziert nach DIN EN ISO 9001:2000. Nirgendwo sonst in Europa werden darüber hinaus sämtliche Arten von Gussglas gefertigt. Ein umfangreiches Produktprogramm wird ständig entsprechend den Kundenbedürfnissen weiterentwickelt:

- Ornamentglas
- Drahtglas
- Solarglas
- LINIT-Profilbauglas
(auch thermisch vorgespannt)
- LINIT-Aluminiumeinbausysteme

Die Verbundenheit mit der oberfränkischen Region, umweltgerechte modernste Herstellungsanlagen (erster sauerstoffbefeuerter Gussglasofen Europas), Flexibilität in der Umsetzung von Kundenwünschen sowie partnerschaftliche Zusammenarbeit mit Lieferanten und Kunden bilden das Fundament der Unternehmensphilosophie der Glasfabrik LAMBERTS.

The family company Glasfabrik LAMBERTS GmbH+Co. KG founded in 1887 in Wunsiedel currently employs a staff of 120 and is the only private specialist flat-glass company in Europe that does not belong to a concern.

The experience gained from 110 years of cast glass manufacturing, manpower with family tradition, in part, already in the 4th generation of active involvement in the company, as well as ultramodern production facilities ensure the highest quality of our products marketed both on a national as well as international scale. The Glasfabrik LAMBERTS is DQS certified according DIN EN ISO 9001:2000. No other company in Europe produces all types of cast glass. Our extensive product range is subject to constant further development to meet customer requirements:

- Pattern glass
- Wired glass
- Solar glass
- LINIT U-profiled glass (also toughened)
- LINIT aluminium installation systems

The bonds with the Upper Franconian region, environmentally acceptable, ultramodern manufacturing facilities (Europe's first oxygen-fired cast glass furnace), flexibility in implementing customer requirements as well as sound partnership and cooperation between suppliers and customers form the foundation of the company philosophy of Glasfabrik LAMBERTS.
